

BEING A WOMAN IS NOT A PRE-EXISTING CONDITION

November 4, 2009

Women's Day of Action for Health Care Reform

Make sure the voice of every woman in America rings through the halls of Congress in the final push for health care reform. And make sure your friends and family know about the outrageous insurance industry practices women face.

- Hold a vigil your community to recognize the women and families who are struggling because of the broken health care system.
- Throw a Health Care House Party or Trivia Night where you challenge your friends & family about their knowledge of what makes health care reform meet the needs of women.
- Participate in our online action on November 4th to demand health care reform that works for women.
- Hold your own creative activity in your local area.

Register today & get the resources to hold an action!
