

Social Security: Vital to Florida Women and Families

Social Security is a family insurance plan that provides retirement benefits and life and disability insurance to Florida's working families.

- About 1 in 5 residents – about 3,784,200 people – receives disability, survivor, and/or retirement benefits from Social Security.
- 84 percent of residents 65 and older receive Social Security benefits.
- About 242,400 children receive Social Security benefits because of the loss of a parent's income due to death, disability or retirement.
- About 593,700 disabled workers and their family members receive Social Security benefits.
- About 276,100 widowed spouses receive Social Security survivor's benefits. (Nationally, women represent virtually all (99 percent) of spouses receiving survivor benefits.)

Florida women depend on modest Social Security benefits to get by.

- Women are a majority of both adult beneficiaries and beneficiaries 65 and older.
- The average Social Security benefit for women 65 and older is about \$12,000 per year, compared to about \$15,800 for men 65 and older.
- Older women rely more on income from Social Security than older men do. Median income for women 65 and older living alone is \$18,600 per year – and Social Security represents 64 percent of that amount. Median income for comparable men is \$27,800 – and Social Security represents 47 percent of that amount.

Social Security is a critical anti-poverty program for Florida women and families.

- Social Security lifted 1,577,000 residents out of poverty, including 71,000 children.
- Social Security dramatically reduced poverty rates for women 65 and older: from 51 to 11 percent for all women 65 and older, and from 65 to 19 percent for older women living alone.
- Social Security also reduced poverty rates for minority women 65 and older: from 60 to 29 percent for older African-American women and from 54 to 23 for older Hispanic women.
