

## Social Security: Vital to Illinois Women and Families

**Social Security is a family insurance plan that provides retirement benefits and life and disability insurance to Illinois's working families.**

- About 1 in 7 residents – about 1,988,100 people – receives disability, survivor, and/or retirement benefits from Social Security.
- 90 percent of residents 65 and older receive Social Security benefits.
- About 159,400 children receive Social Security benefits because of the loss of a parent's income due to death, disability or retirement.
- About 326,500 disabled workers and their family members receive Social Security benefits.
- About 176,500 widowed spouses receive Social Security survivor's benefits. (Nationally, women represent virtually all (99 percent) of spouses receiving survivor benefits.)

**Illinois women depend on modest Social Security benefits to get by.**

- Women are a majority of both adult beneficiaries and beneficiaries 65 and older.
- The average Social Security benefit for women 65 and older is about \$12,500 per year, compared to about \$16,500 for men 65 and older.
- Older women rely more on income from Social Security than older men do. Median income for women 65 and older living alone is \$18,000 per year – and Social Security represents 68 percent of that amount. Median income for comparable men is \$26,300 – and Social Security represents 53 percent of that amount.

**Social Security is a critical anti-poverty program for Illinois women and families.**

- Social Security lifted 780,000 residents out of poverty, including 48,000 children.
- Social Security dramatically reduced poverty rates for women 65 and older: from 49 to 9 percent for all women 65 and older, and from 66 to 16 percent for older women living alone.
- Social Security also reduced the poverty rate for African-American women 65 and older from 53 to 27 percent.
