

Social Security: Vital to Indiana Women and Families

Social Security is a family insurance plan that provides retirement benefits and life and disability insurance to Indiana's working families.

- About 1 in 5 residents – about 1,191,800 people – receives disability, survivor, and/or retirement benefits from Social Security.
- 95 percent of residents 65 and older receive Social Security benefits.
- About 100,900 children receive Social Security benefits because of the loss of a parent's income due to death, disability or retirement.
- About 234,100 disabled workers and their family members receive Social Security benefits.
- About 99,200 widowed spouses receive Social Security survivor's benefits. (Nationally, women represent virtually all (99 percent) of spouses receiving survivor benefits.)

Indiana women depend on modest Social Security benefits to get by.

- Women are a majority of both adult beneficiaries and beneficiaries 65 and older.
- The average Social Security benefit for women 65 and older is about \$12,600 per year, compared to about \$16,900 for men 65 and older.
- Older women rely more on income from Social Security than older men do. Median income for women 65 and older living alone is \$17,400 per year – and Social Security represents 73 percent of that amount. Median income for comparable men is \$24,000 – and Social Security represents 57 percent of that amount.

Social Security is a critical anti-poverty program for Indiana women and families.

- Social Security lifted 485,000 residents out of poverty, including 19,000 children.
- Social Security dramatically reduced poverty rates for women 65 and older: from 55 to 10 percent for all women 65 and older, and from 69 to 16 percent for older women living alone.
