

Social Security: Vital to Kansas Women and Families

Social Security is a family insurance plan that provides retirement benefits and life and disability insurance to Kansas's working families.

- About 1 in 6 residents – about 479,200 people – receives disability, survivor, and/or retirement benefits from Social Security.
- 94 percent of residents 65 and older receive Social Security benefits.
- About 36,300 children receive Social Security benefits because of the loss of a parent's income due to death, disability or retirement.
- About 81,300 disabled workers and their family members receive Social Security benefits.
- About 41,000 widowed spouses receive Social Security survivor's benefits. (Nationally, women represent virtually all (99 percent) of spouses receiving survivor benefits.)

Kansas women depend on modest Social Security benefits to get by.

- Women are a majority of both adult beneficiaries and beneficiaries 65 and older.
- The average Social Security benefit for women 65 and older is about \$12,300 per year, compared to about \$16,400 for men 65 and older.
- Older women rely more on income from Social Security than older men do. Median income for women 65 and older living alone is \$18,600 per year – and Social Security represents 64 percent of that amount. Median income for comparable men is \$28,200 – and Social Security represents 50 percent of that amount.

Social Security is a critical anti-poverty program for Kansas women and families.

- Social Security lifted 189,000 residents out of poverty, including 10,000 children.
- Social Security dramatically reduced poverty rates for women 65 and older: from 55 to 9 percent for all women 65 and older, and from 67 to 13 percent for older women living alone.
