

Social Security: Vital to Mississippi Women and Families

Social Security is a family insurance plan that provides retirement benefits and life and disability insurance to Mississippi's working families.

- About 1 in 5 residents – about 584,500 people – receives disability, survivor, and/or retirement benefits from Social Security.
- 93 percent of residents 65 and older receive Social Security benefits.
- About 69,700 children receive Social Security benefits because of the loss of a parent's income due to death, disability or retirement.
- About 155,200 disabled workers and their family members receive Social Security benefits.
- About 52,100 widowed spouses receive Social Security survivor's benefits. (Nationally, women represent virtually all (99 percent) of spouses receiving survivor benefits.)

Mississippi women depend on modest Social Security benefits to get by.

- Women are a majority of both adult beneficiaries and beneficiaries 65 and older.
- The average Social Security benefit for women 65 and older is about \$11,200 per year, compared to about \$14,900 for men 65 and older.
- Older women rely more on income from Social Security than older men do. Median income for women 65 and older living alone is \$12,900 per year – and Social Security represents 84 percent of that amount. Median income for comparable men is \$15,800 – and Social Security represents 71 percent of that amount.

Social Security is a critical anti-poverty program for Mississippi women and families.

- Social Security lifted 235,000 residents out of poverty, including 27,000 children.
- Social Security dramatically reduced poverty rates for women 65 and older: from 62 to 23 percent for all women 65 and older, and from 84 to 37 percent for older women living alone.
- Social Security also reduced the poverty rate for African-American women 65 and older from 79 to 50 percent.
