

## Social Security: Vital to Nebraska Women and Families

**Social Security is a family insurance plan that provides retirement benefits and life and disability insurance to Nebraska's working families.**

- About 1 in 6 residents – about 303,700 people – receives disability, survivor, and/or retirement benefits from Social Security.
- 94 percent of residents 65 and older receive Social Security benefits.
- About 21,100 children receive Social Security benefits because of the loss of a parent's income due to death, disability or retirement.
- About 47,100 disabled workers and their family members receive Social Security benefits.
- About 26,900 widowed spouses receive Social Security survivor's benefits. (Nationally, women represent virtually all (99 percent) of spouses receiving survivor benefits.)

**Nebraska women depend on modest Social Security benefits to get by.**

- Women are a majority of both adult beneficiaries and beneficiaries 65 and older.
- The average Social Security benefit for women 65 and older is about \$11,800 per year, compared to about \$15,800 for men 65 and older.
- Older women rely more on income from Social Security than older men do. Median income for women 65 and older living alone is \$17,700 per year – and Social Security represents 68 percent of that amount. Median income for comparable men is \$28,800 – and Social Security represents 50 percent of that amount.

**Social Security is a critical anti-poverty program for Nebraska women and families.**

- Social Security lifted 105,000 residents out of poverty, including 3,000 children.
- Social Security dramatically reduced poverty rates for women 65 and older: from 49 to 9 percent for all women 65 and older, and from 65 to 15 percent for older women living alone.
