

Social Security: Vital to Nevada Women and Families

Social Security is a family insurance plan that provides retirement benefits and life and disability insurance to Nevada's working families.

- About 1 in 7 residents – about 391,200 people – receives disability, survivor, and/or retirement benefits from Social Security.
- 91 percent of residents 65 and older receive Social Security benefits.
- About 27,100 children receive Social Security benefits because of the loss of a parent's income due to death, disability or retirement.
- About 63,900 disabled workers and their family members receive Social Security benefits.
- About 26,300 widowed spouses receive Social Security survivor's benefits. (Nationally, women represent virtually all (99 percent) of spouses receiving survivor benefits.)

Nevada women depend on modest Social Security benefits to get by.

- Women are a majority of both adult beneficiaries and beneficiaries 65 and older.
- The average Social Security benefit for women 65 and older is about \$12,200 per year, compared to about \$15,800 for men 65 and older.
- Older women rely more on income from Social Security than older men do. Median income for women 65 and older living alone is \$19,800 per year – and Social Security represents 62 percent of that amount. Median income for comparable men is \$23,900 – and Social Security represents 50 percent of that amount.

Social Security is a critical anti-poverty program for Nevada women and families.

- Social Security lifted 136,000 residents out of poverty, including 6,000 children.
- Social Security dramatically reduced poverty rates for women 65 and older: from 42 to 8 percent for all women 65 and older, and from 61 to 14 percent for older women living alone.
