

Social Security: Vital to New York Women and Families

Social Security is a family insurance plan that provides retirement benefits and life and disability insurance to New York's working families.

- About 1 in 6 residents about 3,280,600 people receives disability, survivor, and/or retirement benefits from Social Security.
- 87 percent of residents 65 and older receive Social Security benefits.
- About 259,500 children receive Social Security benefits because of the loss of a parent's income due to death, disability or retirement.
- About 615,100 disabled workers and their family members receive Social Security benefits.
- About 244,200 widowed spouses receive Social Security survivor's benefits. (Nationally, women represent virtually all (99 percent) of spouses receiving survivor benefits.)

New York women depend on modest Social Security benefits to get by.

- Women are a majority of both adult beneficiaries and beneficiaries 65 and older.
- The average Social Security benefit for women 65 and older is about \$12,900 per year, compared to about \$16,400 for men 65 and older.
- Older women rely more on income from Social Security than older men do. Median income for women 65 and older living alone is \$16,200 per year – and Social Security represents 70 percent of that amount. Median income for comparable men is \$23,700 – and Social Security represents 52 percent of that amount.

Social Security is a critical anti-poverty program for New York women and families.

- Social Security lifted 1,149,000 residents out of poverty, including 55,000 children.
- Social Security dramatically reduced poverty rates for women 65 and older: from 48 to 14
 percent for all women 65 and older, and from 66 to 25 percent for older women living alone.
- Social Security also reduced poverty rates for minority women 65 and older: from 49 to 21 percent for older African-American women, from 60 to 30 for older Hispanic women, and from 53 to 28 for older Asian women.
