Making the Most of Your Retirement Income: Savings

May 2014

As you approach retirement, the decisions you make can have a big impact on your – and your spouse's – future income. As you prepare for retirement, remember that <u>Social Security</u>¹ provides secure lifetime income – but benefits are modest. You can use your savings to add income on top of your monthly Social Security benefit.

How can I make the most of my 401(k) or IRA?

- You can withdraw a certain amount per year and invest the rest until you need it.
- Generally, you can withdraw 4-5% per year (or more, the later you start withdrawals).
- If you take money out of a 401(k) or IRA before age 59 ½, you will be subject to a tax penalty, but you must start making withdrawals by age 70.
- You can use some (or all) of your account balance to ensure lifetime income.
- You can buy a fixed annuity or a variable annuity from an insurance company.
- Different options are available, including term, survivor benefits, the age when benefits start, or even if some amount can go to a beneficiary.
- Look for a strong insurance company. You can research them at AM Best, ambest.com, Standard & Poor's, standardpoor.com, or Moody's, moodys.com
- To find out more, visit annuity.com or immediateannuities.com.
- You can use it to cover your living expenses while you let your Social Security benefits grow.
- To find out more, look at "<u>Social Security: It Pays to Wait</u>"² visit annuity.com or immediateannuities.com.
- You need to research annuities or other financial instruments very carefully and know the terms but they can increase your income and add to your Social Security benefits.

I don't have much saved—what else can I do to improve my retirement security?

- Other things you can consider (besides working):
 - downsizing, sharing your home, or reverse mortgages (but know what you're getting into).
 - try to delay claiming your Social Security benefits if possible. Even a year or two helps!³
