

## Social Security: Vital to South Dakota Women and Families

**Social Security is a family insurance plan that provides retirement benefits and life and disability insurance to South Dakota's working families.**

- About 1 in 5 residents – about 153,500 people – receives disability, survivor, and/or retirement benefits from Social Security.
- 96 percent of residents 65 and older receive Social Security benefits.
- About 10,200 children receive Social Security benefits because of the loss of a parent's income due to death, disability or retirement.
- About 21,500 disabled workers and their family members receive Social Security benefits.
- About 13,800 widowed spouses receive Social Security survivor's benefits. (Nationally, women represent virtually all (99 percent) of spouses receiving survivor benefits.)

**South Dakota women depend on modest Social Security benefits to get by.**

- Women are a majority of both adult beneficiaries and beneficiaries 65 and older.
- The average Social Security benefit for women 65 and older is about \$10,900 per year, compared to about \$14,800 for men 65 and older.
- Older women rely more on income from Social Security than older men do. Median income for women 65 and older living alone is \$17,100 per year – and Social Security represents 66 percent of that amount. Median income for comparable men is \$25,600 – and Social Security represents 47 percent of that amount.

**Social Security is a critical anti-poverty program for South Dakota women and families.**

- Social Security lifted 47,000 residents out of poverty, including 1,000 children.
- Social Security dramatically reduced poverty rates for women 65 and older: from 47 to 10 percent for all women 65 and older, and from 67 to 21 percent for older women living alone.
