

Social Security: Vital to South Dakota Women and Families

Social Security is a family insurance plan that provides retirement benefits and life and disability insurance to South Dakota's working families.

- About 1 in 5 residents – about 150,200 people – receives disability, survivor, and/or retirement benefits from Social Security.
- 96 percent of residents 65 and older receive Social Security benefits.
- About 10,000 children receive Social Security benefits because of the loss of a parent's income due to death, disability or retirement.
- About 20,500 disabled workers and their family members receive Social Security benefits.
- About 14,200 widowed spouses receive Social Security survivor's benefits. (Nationally, women represent virtually all (99 percent) of spouses receiving survivor benefits.)

South Dakota women depend on modest Social Security benefits to get by.

- Women are a majority of both adult beneficiaries and beneficiaries 65 and older.
- The average Social Security benefit for women 65 and older is about \$10,900 per year, compared to about \$14,800 for men 65 and older.
- Older women rely more on income from Social Security than older men do. Median income for women 65 and older living alone is \$17,100 per year – and Social Security represents 66 percent of that amount. Median income for comparable men is \$25,600 – and Social Security represents 47 percent of that amount.

Social Security is a critical anti-poverty program for South Dakota women and families.

- Social Security lifted 47,000 residents out of poverty, including 1,000 children.
- Social Security dramatically reduced poverty rates for women 65 and older: from 47 to 10 percent for all women 65 and older, and from 67 to 21 percent for older women living alone.
