

## Social Security: Vital to Tennessee Women and Families

**Social Security is a family insurance plan that provides retirement benefits and life and disability insurance to Tennessee's working families.**

- About 1 in 5 residents – about 1,215,100 people – receives disability, survivor, and/or retirement benefits from Social Security.
- 94 percent of residents 65 and older receive Social Security benefits.
- About 108,400 children receive Social Security benefits because of the loss of a parent's income due to death, disability or retirement.
- About 269,600 disabled workers and their family members receive Social Security benefits.
- About 105,400 widowed spouses receive Social Security survivor's benefits. (Nationally, women represent virtually all (99 percent) of spouses receiving survivor benefits.)

**Tennessee women depend on modest Social Security benefits to get by.**

- Women are a majority of both adult beneficiaries and beneficiaries 65 and older.
- The average Social Security benefit for women 65 and older is about \$11,800 per year, compared to about \$15,800 for men 65 and older.
- Older women rely more on income from Social Security than older men do. Median income for women 65 and older living alone is \$14,900 per year – and Social Security represents 75 percent of that amount. Median income for comparable men is \$22,300 – and Social Security represents 56 percent of that amount.

**Social Security is a critical anti-poverty program for Tennessee women and families.**

- Social Security lifted 55,000 residents out of poverty, including 39,000 children.
- Social Security dramatically reduced poverty rates for women 65 and older: from 55 to 13 percent for all women 65 and older, and from 71 to 23 percent for older women living alone.
