

Social Security: Vital to Vermont Women and Families

Social Security is a family insurance plan that provides retirement benefits and life and disability insurance to Vermont's working families.

- About 1 in 5 residents – about 128,600 people – receives disability, survivor, and/or retirement benefits from Social Security.
- 96 percent of residents 65 and older receive Social Security benefits.
- About 9,900 children receive Social Security benefits because of the loss of a parent's income due to death, disability or retirement.
- About 26,000 disabled workers and their family members receive Social Security benefits.
- About 9,300 widowed spouses receive Social Security survivor's benefits. (Nationally, women represent virtually all (99 percent) of spouses receiving survivor benefits.)

Vermont women depend on modest Social Security benefits to get by.

- Women are a majority of both adult beneficiaries and beneficiaries 65 and older.
- The average Social Security benefit for women 65 and older is about \$12,000 per year, compared to about \$15,900 for men 65 and older.
- Older women rely more on income from Social Security than older men do. Median income for women 65 and older living alone is \$16,500 per year – and Social Security represents 72 percent of that amount. Median income for comparable men is \$29,900 – and Social Security represents 48 percent of that amount.

Social Security is a critical anti-poverty program for Vermont women and families.

- Social Security lifted 45,000 residents out of poverty, including 2,000 children.
- Social Security dramatically reduced poverty rates for women 65 and older: from 57 to 13 percent for all women 65 and older, and from 70 to 22 percent for older women living alone.
