“What a woman makes for every dollar a man makes” is the ratio of female and male median earnings for full-time, year-round workers. Earnings are in 2013 dollars. The “wage gap” is the additional money a woman would have to make for every dollar made by a man in order to have equal annual earnings. State wage gaps calculated by National Women’s Law Center (NWLC) are based on 2011-2013 American Community Survey Three-Year Estimates (<http://www.census.gov/acs/www/>). National wage gap calculated by NWLC is based on 2014 Current Population Survey, Annual Social and Economic Supplement (<http://www.census.gov/hhes/www/income/>).
