*Share of minimum wage workers who are women:* NWLC calculations based on unpublished U.S. Department of Labor, Bureau of Labor Statistics data for all wage and salary workers. Figures are annual averages for 2013. Available data do not permit a precise calculation of the percentage of women making the state minimum wage in all states due to the increments by which wages are reported. Estimates are based on the share of workers who are women at or below the reported wage levels immediately above and below the relevant state's minimum wage. "Minimum wage workers" refers to workers making the minimum wage or less.
