

Social Security: Vital to Wyoming Women and Families

Social Security is a family insurance plan that provides retirement benefits and life and disability insurance to Wyoming's working families.

- About 1 in 6 residents – about 88,700 people – receives disability, survivor, and/or retirement benefits from Social Security.
- 95 percent of residents 65 and older receive Social Security benefits.
- About 6,200 children receive Social Security benefits because of the loss of a parent's income due to death, disability or retirement.
- About 13,600 disabled workers and their family members receive Social Security benefits.
- About 7,200 widowed spouses receive Social Security survivor's benefits. (Nationally, women represent virtually all (99 percent) of spouses receiving survivor benefits.)

Wyoming women depend on modest Social Security benefits to get by.

- Women are a majority of both adult beneficiaries and beneficiaries 65 and older.
- The average Social Security benefit for women 65 and older is about \$11,800 per year, compared to about \$16,000 for men 65 and older.
- Older women rely more on income from Social Security than older men do. Median income for women 65 and older living alone is \$17,300 per year – and Social Security represents 72 percent of that amount. Median income for comparable men is \$19,700 – and Social Security represents 65 percent of that amount.

Social Security is a critical anti-poverty program for Wyoming women and families.

- Social Security lifted 30,000 residents out of poverty.
- Social Security dramatically reduced poverty rates for women 65 and older: from 49 to 11 percent for all women 65 and older, and from 61 to 17 percent for older women living alone.
