*State has insufficient data due to small sample sizes to calculate state wage gap for Native American women.

Source: State wage gaps calculated by National Women's Law Center (NWLC) are based on 2015-2019 American Community Survey 5-year estimates. National wage gap calculated by NWLC is based on the 2019 American Community Survey. "What Native American women make for every dollar white, non-Hispanic men make" is the ratio of women's and men's median earnings for full-time, year-round workers. Earnings are in 2019 dollars. "Lifetime losses due to wage gap" or the "Lifetime wage gap" is what a woman would lose, based on today's wage gap, over a 40-year career. Figures are not adjusted for inflation. "Age at which a Native American woman's career earnings catch up to white, non-Hispanic men's career earnings at age 60" assumes all workers begin work at age 20. Assuming men have a 40-year career and retire at age 60, this is the age at which women are able to retire with the same lifetime earnings as their male counterparts. Ranks based on unrounded data. People in both surveys self-identified as either male or female. Native American women are those who self-identified in the survey as American Indian or Alaskan Native. White, non-Hispanic men refer to those who have self-identified as white but who are not of Hispanic, Latino, or Spanish origin."
