

How Federal Actions Are Increasing Costs for Floridians

This Fourth of July doesn't just mark the United States' 250th birthday, it also marks the **one-year anniversary of the One Big Beautiful Bill Act (OBBBA)**, a sweeping tax and budget law that paid for billionaire class tax breaks through massive cuts and eligibility changes to Medicaid, the Supplemental Nutrition Assistance Program (SNAP), and other programs that support the health and wellbeing of women, children, and families in Florida and across the country.

Combined with the January 2026 expiration of improved Affordable Care Act (ACA) health insurance subsidies ([enhanced premium tax credits](#), or ePTCs), which helped millions afford health insurance on the ACA Marketplace, families in Florida are left struggling more than ever. Congress' inability to extend ePTCs, along with the passage of OBBBA, **raised costs on health care, food, and education for Floridians** — all in order to pay for new billionaire tax cuts.

To add insult to injury, the law also creates a huge financial burden on states, which are facing serious budget constraints due to federal funding cuts. Florida families are hurting, and they're struggling to make ends meet. [In an April 2026 survey](#), 74% of women said they are worried about affording groceries, and 71% of mothers with children under 18 worried about affording health care.

Driven by a persistent wage gap, **full-time working women in Florida are paid just 84 cents for every dollar earned by men**,¹ creating significant financial disadvantage for women at a time when families depend on women's wages even more. Rising inflation due to bad policies, tariffs, and new wars has compounded the affordability crisis. Now more than ever, we need policies that uplift women, children, and families alongside federal leadership that doesn't undercut state budgets through targeted funding freezes and proposals that shift costs on to states.

As a result of OBBBA, Florida families are seeing higher prices on basic needs and struggling to make ends meet, with women and children bearing the brunt of these cuts. Meanwhile, the state of Florida is left scrambling to provide basic needs for Floridians while maintaining a balanced budget with far less federal investment.

HEALTH CARE ACCESS IN FLORIDA

Between July 2025 and February 2026, **17,014 adult Floridians lost Medicaid**,² in addition to **74,385 children**.³ Nearly **60% of adults 19+ on Medicaid in Florida are women**.⁴

Between July 2025 and January 2026, **1,869 fewer children enrolled in the Children's Health Insurance Program (CHIP)**⁵—a pivotal safety net for families who don't qualify for Medicaid.

As a result of OBBBA, **Florida's Medicaid program will see a \$14 billion reduction in federal funding through 2034**,⁶ forcing the state to either shrink the program or make cuts to other programs Floridians rely on to make up for the loss of federal funding.

In 2024, **Florida relied on the federal government for 58% of its Medicaid spending**.⁷ As OBBBA provisions take effect, this number will plummet.

From 2025 to 2026, **196,643 fewer Floridians enrolled in the ACA Health Insurance Marketplace**.⁸

As of May 2026, **at least three rural hospitals in Florida are at immediate risk of closing**,⁹ in part due to Medicaid funding cuts.

FOOD AFFORDABILITY AND SNAP IN FLORIDA

Between July 2025 and February 2026, **303,063 Floridians lost their SNAP benefits**.^{10,11}

In Florida in 2023, **33.7% of households receiving SNAP had children**¹² and **16.5% had a non-elderly person with a disability**.¹³

In order to maintain SNAP participation rates, **Florida will have to increase SNAP's share of the state budget by 768%**.¹⁴

STATE ECONOMIC IMPACTS AND AFFORDABILITY

In Florida, **the average cost of infant care is \$13,011 per year**,¹⁵ and **married couples spend 11% of their income** on infant care. **Single parents spend 32% of their income** on infant care.

In 2024, only **52.6% of Florida households earn enough to make ends meet.**¹⁶

In 2025, **18.2% of student loans in Florida were delinquent**¹⁷—a sign that graduates struggle to pay their loans as well as basic needs. OBBBA’s cuts to Pell grants and other assistance will make it even harder to afford higher education.

Because of related downstream economic effects for businesses that serve health providers and their staff, **Florida is projected to lose 57,500 jobs in 2026**¹⁸ due to ePTC expiration.

We need solutions for women and families, and we need them now. Defunding support they rely on, ignoring the affordability crisis, and pursuing tax breaks and benefits for the billionaire class at the cost of longstanding and popular programs threaten the freedom and security of women and families. **It’s time for policies that help women and families rather than prioritize billionaires.**
